Go Solar Now!

Save Money Over Your Expensive Power Bill

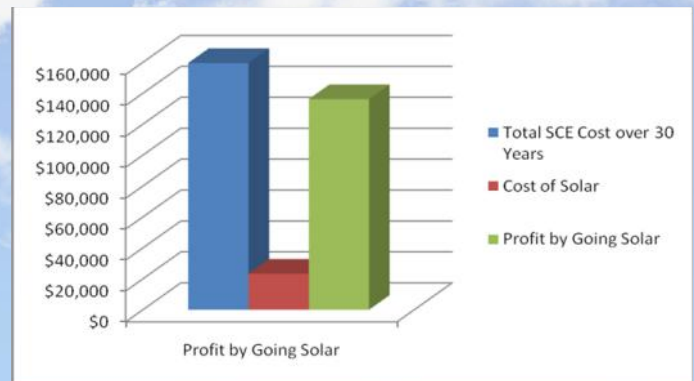

In Southern California solar power is abundant, very cost effective and systems last for 30 years and more. Ecologically, and more importantly financially, Going Solar may be your single best investment!

BUY, DO NOT LEASE, AND GO SOLAR FOR \$0 DOWN

SCE power costs have gone up 4.5% every year from 2001 to 2011. They went up 5% in 2012, and the PUC has already approved 6% increases for the next 3 years. Assuming only 4.5% annual increases thereafter a power bill that is \$200 a month now will total about \$160,000 in payments to your power company over the next 30 years. And solar power costs only a fraction of that.

GO SOLAR FOR \$0 DOWN:

- Solar Financing programs are available
- Buy, do not Lease your system
- Keep your rebates and tax credits
- Power Rates are Constantly Increasing.
- After 30 years you will have paid SCE \$159,157.
- Going Solar TODAY will cost \$16,380 (6kW System) after Federal Tax Credit, and less if you live in Los Angeles or Pasadena.

Depending on your power company, solar rebates are available to help reduce the cost of the system. After that the 30% Federal Solar Tax Credit is a great help in bringing down the cost of Solar. Installation is quick, typically just a few days, and we take care of everything, permits, power company registration and approval, rebate processing, etc... Check with your tax preparer for your specifics on the 30% federal solar tax credit.

all parts and labor, and 25 year solar panel labor warranty.

SOLAR INCREASES THE VALUE OF YOUR HOME:

- DOE – Berkeley Labs reports average CA home equity increase of \$5.50 per installed Watt (April 2011).
- Our after incentives cost is about \$2.80 per watt.
- Instant Home Equity Increase by Going Solar!
- Solar panels have a 25 year 85% efficiency Warranty.
- Power Inverters have an extendable 10 year Warranty.
- We have a 10 year limited warranty on workmanship and

Call, Text or eMail us for a quick and easy no hassle appointment to see how you can start saving money, add equity to your home or business, and see how going solar can best work for you.
